

## Series DH Tubular Air Duct Heaters

Series DH Tubular Air Duct Heaters feature Incoloy® 840 elements, stainless steel element support, stainless steel support rods, 3-1/2" high temperature insulation below flange, NEMA 1 terminal enclosure, and replaceable element design.

**High temperature (1200°F max.)**

Recommended Operating Conditions	
Air Speed (ft. per second)	Max. Operating Temp
4	1000°F
9	1100°F
16	1200°

### Features:

- 20 watts per sq. inch on sheath
- Incoloy 840 elements – 1700°F max. sheath temperature
- Stainless steel element support
- Stainless steel support rods
- 3 1/2" high temp. insulation below flange
- 1/4" or 3/8" thick painted steel flange
- Nichrome A resistance wire sized for low wire watt density
- Recompacted bends
- Replaceable element design
- NEMA 1 terminal enclosure
