product...*

OUR PRODUCTS:

INDUSTRIAL HEATERS

- Tubular Heaters
- Screw Plug Heaters
- Flange Immersion Heaters
- Circulation Heaters
- OTS Immersion Heaters
- Air Duct Heaters

COMPONENT HEATERS

- Machined Plate Heaters
- Cast-In Heaters
- Cartridge Heaters
- Strip Heaters
- Band Heaters
- Coil Heaters
- Flexible Heaters
- Infrared Radiant Heaters
- Heated Hose

PROCESS CONTROLS

- Control Panels
- Temperature Controls
- Temperature Indicators
- Relays
- Chart Recorders

COLD WEATHER PRODUCTS

- Heated Insulation Blankets
- Temperature Regulators
- Heat Trace Cable
- Heat Trace Accessories

HEAT EXCHANGERS

- Immersion Plates
- Plate Blanks
- Integral Jackets
- Clamp-On Plates
- Custom Design
- Shell & Tube
- Finned Coils
- Plate & Frame

SENSORS

- Custom Temperature Sensors
- MGO Insulated Thermocouples
- Industrial Thermocouples
- RTDs
- Thermowells
- Temperature Transmitters

INLINE AIR/GAS HEATERS

- Cast Inline Circulation Heaters
- Closed Loop Process Air Heaters
- Threaded In-line Air Heaters
- Flange In-line Heaters
- Low Pressure In-line Heaters
- Flow Torch In-line Heaters
- Cool Touch In-Line Heaters

*PROCESS HEAT SOLUTIONS
FOR 20+ YEARS!*

SOUTHEAST THERMAL SYSTEMS

ABOUT US AND OUR HISTORY

Southeast **T**hermal **S**ystems was established in 2001 by founder and company President, George Coyazo. Southeast Thermal Systems is a dedicated provider of services and products specializing in the process heat industry. We offer tailored thermal solutions for manufacturing processes, delivering heating elements, and expertly designed thermal assemblies for seamless process integration. We specialize in updating aging manufacturing equipment, excelling in the redesign of alternatives, and the replacement of hard-to-find OEM parts sourced domestically.

With decades of experience in the process heat industry, George Coyazo brings a wealth of knowledge. His commitment is evident through providing technical support and thermal process solutions. Whether it's updating existing manufacturing equipment or creating new designs with the most efficient heating and control methods, he recognizes the importance of immediate field technical support for our customers.

Updating old manufacturing equipment is our specialty, replacing hard to find OEM parts redesigned and sourced domestically.

OUR PROMISE TO YOU

Southeast **T**hermal **S**ystems promises to always offer hassle-free and personalized field technical assistance to minimize downtime. We will assist in the modernization of machines and auxiliary equipment, as well as utilize the latest technology in replacement parts to enhance your process needs. We take pride in delivering affordable, high-quality products carefully crafted to meet your specifications and exceed your expectations.

SERVICES AND INDUSTRY APPLICATIONS

- Process Heat Solutions
- Systems Design
- Project Management
- Redesigning old OEM parts, replacing hard-to-locate items with parts made in the USA
- Job Site Technical Assistance
- Engineered Products
- Aerospace
- Electrification & Decarbonization
- Automotive
- Medical & Laboratory
- Paper & Printing
- Research
- Sterilization
- Energy (Clean Pollution Free Technologies)
- Alternate Fuels
- Industrial Process
- Packaging
- Plastics
- Semiconductor & Electronics
- Textiles
