

URS CORPORATION: COLD WEATHER FRAC TANK SOLUTION WITH POWERBLANKET

POWERBLANKET TANK HEATERS MAINTAIN TEMPERATURE AND HEAT, PROVIDE FREEZE PROTECTION, AND OPTIMIZE FLOW FOR VISCOUS AND TEMPERATURE SENSITIVE MATERIALS.

Powerblanket supplied the frac tank heating system currently working on-site. The heating system installed quickly despite rainy weather, and has protected the contents from freezing.

EDWARD SKUCHAS, ENGINEER WITH URS

SUMMARY

URS Corporation implemented a new solution to keep ground water collected in frac tanks from freezing at the Knolls Atomic Power Laboratory. Located in Niskayuna, NY, the Knolls Atomic Power Laboratory (KAPL) is dedicated to the support of the US Naval Nuclear Propulsion Program. KAPL was developed after World War II in 1946 under a contract between General Electric and the United States government.

Today, KAPL is a government-owned, contractor-operated laboratory run by

Bechtel Marine Propulsion Corporation for the US Department of Energy. KAPL is responsible for the research, design, construction, operation, and maintenance of U.S. nuclear-powered warships, and manages work on nuclear ships at numerous shipyards across the country.

BACKGROUND

On January 7, 2008, the U.S. Department of Energy (DOE) awarded URS Corporation a \$67 million task order to deactivate and demolish the Separations Process Research Unit (SPRU) located at the Knolls Atomic Power Laboratory in Niskayuna, New York. The site, used for U.S. atomic weapon research, closed in 1953.

Part of the operation involves collecting, transferring, and storage of ground water in frac tanks located on-site. URS Corporation realized

POWERBLANKET PROVIDES THE MOST INNOVATIVE HEATING SOLUTIONS ON THE MARKET, PROVIDING UNIFORM SAFE HEAT.

they needed to keep the ground water in the frac tanks from freezing. They contacted Powerblanket® for a custom solution.

Powerblanket's world-class custom design team accepted the challenge and delivered quickly to have the system in place in time for winter. This solution provided freeze protection, allowing for continuous operation and minimized downtime during the project. URS completed their project on time and on budget thanks to Powerblanket's custom frac tank heaters.

CUSTOM TANK HEATING

Powerblanket provides the most innovative heating solutions on the market, providing uniform safe heat. Our custom engineered wraps are no exception. With a full team of design engineers, custom heating solutions provide maximum freeze protection for a wide variety of applications. Heating, insulating, thawing, and protecting fluids from harsh outdoor environments is our specialty.
